Profile

Dynamic software engineer seeking challenging opportunities to expand expertise in cutting-edge technologies and frameworks. Committed to staying updated of industry trends and leveraging emerging tools to drive innovation and deliver impactful solutions.

Professional Experience

IT Intern
It Greens Solution

- Tasked with maintaining existing React applications, which includes identifying and fixing bugs, implementing enhancements, and updating features as required.
- Developed interactive and user-friendly UI components using React.js, HTML, CSS, and JavaScript to create seamless web applications.
- Conducted thorough testing of the software to ensure it meets quality standards and functions correctly.
- **Accomplishments:** Successfully reduced bug resolution time by 30% through proactive issue identification and efficient problem-solving.

Junior Mern Stack Developer
Percepco

- Developed responsive web applications using React and Next.js including admin dashboards, e-commerce websites, and many more.
- Developed a professional company website showcasing products, services, and company information.
- Integrated APIs to fetch and display external data, such as product information, user data, and payment gateways.
- Maintained and enhanced existing systems, including bug fixes, performance optimizations, and feature enhancements.
- Implemented version control using Git for tracking changes, collaborating with team members, and managing codebase versions.
- **Accomplishments:** Solely managed and delivered multiple high-priority projects within a 6-month time span, ensuring timely completion and maintaining high-quality standards.

Software Developer Intern
SmartTechOne

- Gained hands-on experience in building dynamic, single-page applications using Angular framework.
- Designed and implemented reusable Angular components to streamline development processes.
- Utilized Angular's data binding and service features to create interactive and responsive web applications.
- Integrated RESTful APIs to enhance the functionality of web applications, ensuring seamless communication between the frontend and backend.
- **Accomplishments:** Created and deployed a full-fledged educational platform website, accessible at academio.vercel.app ⌗, showcasing the skills and knowledge gained during the internship.

Education

2020 – 2024	**Bachelor of Science in Software Engineering**
Islamabad	*Air University*
2017 – 2019	**FSc**
Rawalpindi	*Punjab Group of Colleges*

Skills

React js	Next js
Angular	Tailwind css
Express js	Prisma
HTML	CSS
JavaScript	MySql
PostgresSql	Git
RESTful APIs	Version Control

Languages

- Urdu
- English

Certificates

- Meta Front End Developer Certificate

Projects

Freelance Website
Final Year Project
Created a dynamic freelance website, offering a user-friendly platform for seamless client-freelancer interactions. With the help of intuitive features, it simplifies the process of finding talent and collaborating on projects.

Fashion Flow ⊡
E-commerce website
Developed a modern e-commerce platform using Angular and Tailwind, offering a stylish and intuitive shopping experience for clothing, shoes, glasses, and accessories. The platform is designed for fashion-forward consumers, providing a seamless interface to explore and purchase their favorite styles effortlessly. With responsive design and smooth performance, it serves to a wide range of customers, delivering both convenience and aesthetic appeal.

Weather Forecast Application
Developed a weather application using React and integrated it with a weather API to provide real-time weather information to users. Key features of the application include dynamic city selection, real-time updates, responsive design, customization options, a user-friendly interface, and efficient data fetching.

Academio (Educational Website) ⊡
Developed an online learning platform using Angular and Tailwind to connect users with a diverse array of courses from various disciplines, allowing them to explore, learn, and grow. Inspired by platforms like Coursera and Udemy, Academio provides an intuitive and clean user interface to enhance the user experience when discovering and enrolling in new courses. You may reach the website at academio.vercel.app ⊡ .

Real Estate Website
Created a real estate website using Next.js offering users a seamless platform to explore properties based on their preferred sales type, whether it's buying, selling, or renting. With intuitive search functionalities, users can easily filter through listings to find their ideal home. Through a user-friendly interface and efficient contact features, the website aims to provide a convenient and transparent experience for individuals navigating the real estate market.

Admin Dashboard
Developed an admin dashboard that was designed to streamline administrative tasks and facilitate efficient management of user and organizer activities. Integrated with API functionality, the dashboard empowers administrators with a wide range of capabilities. Admins can monitor user and organizer interactions, track event registrations, and manage content with ease. With a user-friendly interface, the dashboard provides quick access to vital information, including user profiles, event details, and analytics reports. Additionally, administrators have the authority to block or delete users and organizers, ensuring compliance with platform guidelines and maintaining a safe and secure environment for all users. Through seamless integration of API services, the dashboard optimizes administrative workflows, allowing admins to make informed decisions and effectively oversee platform operations.
